A child developed diphtheria after putting on the clothing worn by a child which had died of diphtheria two months before. In a number of isolated dwellings diphtheria developed nearly a year after previous outbreaks without there being any apparent possibility of a new infection taking place from the outside. Disinfection, after these diseases is of the highest importance. Then, again, there are those diseases that are not fatal, perhaps, but, being communicable, may become certainly afflictions, nuisances. This precaution therefore should be demanded of every landlord by those who are planning to rent the house. - Public Health, Michigan.
